As healthcare providers, our relationship is with you, not your insurance company. While filing your insurance claim is a courtesy that we provide for our patients, all charges not paid by your insurance in 60 days are your responsibility. You are responsible for all charges. It is your responsibility to know the terms of the contract with your insurance company. Not all services are a covered benefit in all insurance contracts. These non-covered services will be the responsibility of the patient. Estimates and pre-treatment estimates are "estimates" only and not a guarantee.
